# CAD & CAG Series

## Midsize Custom Coaters

Yasui Seiki specializes in designing and manufacturing one-of-a-kind coating machines with MICROGRAVURE™ and slot die coating heads.

Most of our custom parts are machined in-house in Japan to 1/1000th of a millimeter.

CAD and CAG models represent typical Yasui Seiki midsize custom coaters.

### Compact Coater CAD-s2/MG/LU/1.0H

This is a classic example of a Yasui Seiki midsize coater. Compact and easy-access. Designed with the user in mind.

- MICROGRAVURE™ and applicator box coating
- 280 mm wide coating
- 2 - 20 m/min line speed
- 2 meter long, electric hot air slit nozzle dryer
- UV cure
- Dry laminator
- AC servomotor sectional drive

### Midsize Test Coater CAD-s3/MD/U/4.0

Another classic example of a Yasui Seiki midsize coater. The entire coating machine is enveloped in a box, creating a clean room environment.

- MICROGRAVURE™ and slot die coating
- 300 mm wide coating
- 2 - 20 m/min line speed
- 4 meter long, electric hot air slit nozzle dryer
- UV cure
- AC servomotor sectional drive

### Flexible Coater CAG-s3/MDN/CU/4.5H

A midsize coater loaded with options, including the corona treater and IR heater. This machine covers the widest range of coating needs - from thin to thick coating with low to high viscosity solutions.

- MICROGRAVURE™, slot die, and knife coating
- 300 mm wide coating
- 0.5 - 5 m/min line speed
- 4.5 meter long, electric hot air slit nozzle dryer
- UV cure
- IR heat circulation heater
- Corona treatment
- Dry laminator
- AC servomotor sectional drive

### Dual-Side Coater CAG-M5.2f/M/L/7.6H

This coater lets you deposit ultra thin coating with MICROGRAVURE™ on both sides of the substrate. This machine can also handle very fragile webs.

- Dual MICROGRAVURE™ coating
- 520 mm wide coating
- 7.6 meter hot air dryer
- 1 - 10 m/min line speed
- Dry laminator
- Expander roll
- Explosion proof
- Special unwinder
